

-- FIRE SAFETY WARNING --

February 10, 2020

Outside, wildfire safety begins by making sure you, your family and your home are PREVENTING, PREPARED and/or READY for a wildfire. California's Mediterranean climate lends itself naturally to wildfires, which is why residents and vacationers must take extra caution when outdoors and steps to prevent wildfires.

The Board of Directors for Ridgeline Homeowners Association asks that ***all homeowners refrain from burning any type of campfire or pit fires on their property or within the forestry.***

REMINDER FROM CAL FIRE: Whether it's using powered equipment before 10 a.m. when the humidity is higher and temperatures cooler to reduce the chance of fire, to follow proper guidelines for burning branches and leaf debris on your property, *we must all do our part to prevent wildfire.*
